NLDS Lab: Notes

Sam Wing
sampwing@soe.ucsc.edu

Abstract

Keep track of papers which I have read and any thing I find relevant. Beats using note paper.

1 Past Work

1.1 Sarcasm

Sarcasm is common in opinionated user generated content, blog posts among others.[9] Does this also apply to forums data? Would determining if a post was highly opinionated before trying to classify it lead to better results?

1.2 Sentiment Analysis

There is a pretty comprehensive overview on the current state of the art challenges of opnion mining and sentiment analysis by pang[7]

1.3 Narrative Schemas

Information regarding event chains[2] and narrative schemas[3]

1.4 Persuasion

Anderson's paper on integration theory[1]
  Davie's Paper on Dogmatism[4]
  Devine's Paper on Jury Decision Making[8]
  Petty's Paper on personal involvement[6]
  Tversky's Paper on Judgement Biases[5]
